Mounting	Wall
Lamp (Bulb) Description	2 x MULTICHIP LED 3000K 600lm CRI 80 - 10W
Environment	Indoor/Outdoor - Wet Locations
Dimming	Not dimmable
Finish	Anthracite
Technical and Product Description	The Clessidra wall sconce was first designed by Antonio Citterio in 2011.

The Clessidra outdoor wall light has a body made of die-cast aluminum with a powder coated finish and diffuser in PMMA with an aluminum wall attachment. The cover is in PA66. The fixture has a moisture rating of IP55. A back-plate in brown finish is included to cover the junction box. Clessidra also has non-replaceable, high-efficiency lenses specially designed for the application.

Clessidra is a great option for illuminating hallways and outdoor spaces. The LED lamp source provides diffused direct and indirect light. The fixture is non-dimmable.

The Clessidra outdoor wall light is available in two beam spreads:

- Outdoor: 20° + 20°
- Outdoor: 40° + 40°

and two finishes: anthracite and dark brown.

This wall light is also available as an [indoor fixture](#) with different finishes.

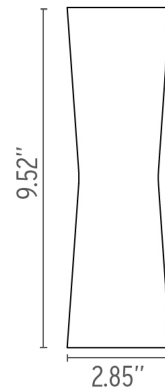

Inspiration Behind the Design:

Antonio Citterio was inspired by the shape of an hourglass. He named his wall light after the very thing that inspired him. "Clessidra" is Italian for hourglass.
