Finish	Brass
Technical and Product Description	The IC Lights F floor lamp was designed by Michael Anastassiades in 2014 and is a part of the IC Lights series. View the entire IC Lights series here .

The IC Lights F floor lamp is an amazing amalgamation of light and balance. This indoor contemporary floor lamp has a blown opaline glass diffuser and the body is finished with brassed or chrome steel. It also comes with a dimmer on the power chord.

This designer floor lamp can be placed in any indoor space and emits a warm diffused light.

IC Lights F comes in two models and is available in brass or chrome finish:

- IC Lights F1: height 53"

- IC Lights F2: height 73"

Inspiration Behind the Design: Michael Anastassiades attempts to encapsulate the movement of a juggler as he makes a ball move with ease and balances it at startling angles. The designer's love of industrial simplicity is showcased in these lights and how he likens the design to a juggling act in which both sphere and baton are skillfully balanced.

On the other hand, the letters 'IC' denote the identity code used to evaluate immigrants entering the UK. This component of balance also relates to the lives of these immigrants as they juggle to adjust to a new society and its demands.
