

BIKINI

Design: Bevk Perović Arhitekti

Ceiling lamp

Designed to fit into corridors and hallways, bathrooms and lobbies, Bikini is yet another Vertigo lamp that 'celebrates' the light source itself: a large oval refractor frames the old fashioned but still loved bulb form.

Usable as a singular lamp or arranged in groups (equally attractive in random or orderly arrangements), Bikini is the light we always need: simultaneously designed and undesigned, simultaneously small (bulb) and large (shade).

Simple and straightforward, it fits everywhere.

Year of design: 2011
