

BUBBLE

Design: Smoke Detektors

BUBBLE 500/250

The lamp is reminiscent of a lively, bubbling source of spring water, lava or therapeutic mud. It represents the inner force of the earth that bubbles with energy. The form suggests movement, changes and the instability of natural phenomena, even though the light is constant and uniform. Without a metal frame Bubble expresses its form pure and is practically invisible. Its amorphous form enables use of the electronic pre-switch device and the battery module. The modularity of the three sizes allows us to follow the architecture. The light is deflected in all directions and spreads pleasantly across the space.

Year of design: 2008

-

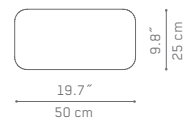

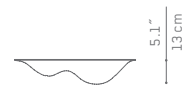

Material: acrylic, metal

Colour: white

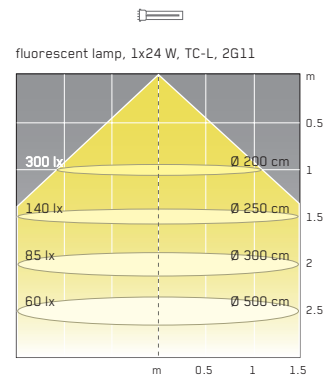

-

Specifications

Light source Code	TC-L, 1 x 24 W - not included V01001 5209 / EVG
Typology	ceiling / wall lamp
Light emission	direct
Class	⊕
Installation	▽
IP rating	IP20
Certificate	CE
Glowltest	650°C

PHOTOMETRIC DATA

Please note:

Tolerance on the values calculated from photometrics: 15%
Max. illuminance levels (lx) are measured on luminaire's axis

Specifications

Light source	fluorescent 1 x 55 W, T5-R - not included
Code	V01001 5201 / EVG
Typology	ceiling / wall lamp
Light emission	direct
Class	⊖
Installation	▽
IP rating	IP20
Certificate	CE
Glowltest	650°C

PHOTOMETRIC DATA

Total flux of luminaire = 1830 lm

Please note:

Tolerance on the values calculated from photometrics: 15%
Max. illuminance levels (lx) are measured on luminaire's axis
